

ROHIT RAMESH

Cincinnati, OH | (513)-253-5023 | rameshrt@mail.uc.edu | linkedin.com/in/rohitrameshUC

EDUCATION

Bachelor of Science in Computer Science; Minor in Business Administration

Expected Graduation: May 2028

University of Cincinnati, Cincinnati, OH

GPA: 3.98/4.00

- University Honors Program; VP of Data and Technology for Alpha Kappa Psi CEAS Dean's List; UC Global Scholar

EXPERIENCE

Data Engineering Intern | *Great American Insurance Group*

May 2026 - August 2026

- Constructed an automated ETL ingestion pipeline by extracting WSAPI Rally data via REST APIs, leveraging Python and Snowpark to seamlessly transform and load complex datasets into Snowflake
- Streamlined database governance via a YAML driven Python RBAC engine and ServiceNow integration, automating 11 access workflows across 5 accounts to reduce turnaround time from 15 to 2 minutes for 246 users.
- Designed interactive Power BI dashboards by aggregating, filtering, and modeling raw data from disparate sources, equipping 50+ stakeholders with cross-platform analytics and saving 20+ hours of manual reporting per month.

Software Engineering Intern | *Phillips Edison & Company*

August 2025 - December 2025

- Modernized legacy systems by engineering REST APIs in MRI Logic Builder, tested via Postman, and configuring Power Automate workflows to replace direct SQL with secure JSON data processing
- Developed a custom API wrapper with OpenAI's GPT and RAG to extract and store categorized JSON data from 25+ legal documents in Azure Cosmos DB, automating accurate information retrieval
- Developed an end-to-end ETL pipeline for processing 400+ daily emails using Azure AI Studios, Azure Data Factory, and PySpark, reducing processing time by 95% and implementing robust error handling and data validation mechanisms

Undergraduate Research Fellow | *Extended Reality Lab*

April 2025 - August 2025

- Engineered an end-to-end computer vision pipeline using YOLOv8, OpenCV, Pandas, and Seaborn for real-time vehicle tracking, generating dynamic motion heatmaps that provide actionable insights into traffic flow and density patterns
- Architected an automated synthetic-data pipeline in Unreal Engine and NVIDIA Omniverse, integrating 3D Digital Twin reprojection and LLM summaries to slash manual labeling time by 70%
- Developed a multi-agent LLM framework using MTConnect which enables real-time fault diagnosis, machine control, and remote process optimization for industry partners

PROJECTS

NeedleHelp | *University of Cincinnati, Cincinnati, OH*

March 2025 - May 2025

- Built an ML predictive model using Scikit-learn's Random Forest and Pandas, deploying it via a Flask REST API to stream real-time surgical guidance and integration with modern OR workflows.
- Secured 1st Place Overall at RevolutionUC 2025 among 100+ teams for innovation in surgical automation of the placement of subdermal needle electrodes

Movie Recommendation System | *University of Cincinnati, Cincinnati, OH*

December 2024 - January 2025

- Developed an item-based collaborative filtering system using R and Python, boosting recommendation accuracy by 20%
- Utilized R libraries (like caret and recommenderlab) and Python (with pandas and numpy) to implement the filtering algorithm for optimized movie suggestions

TECHNICAL SKILLS

Programming: Python (Flask), R, SQL, JavaScript/TypeScript (React, Next JS), C++

AI/ML: PyTorch, OpenCV, TensorFlow, Scikit-learn, Pandas, Seaborn

Databases: Snowflake, Microsoft SQL Server, MySQL, SQLite, Azure Cosmos DB, Oracle DB

Tools & Platforms: Power BI, Tableau, Power Automate, Informatica, Copilot Studio

Language: French (B1), German (B1), Sanskrit (A2), Polish (A2), Hindi (B1), Tamil (C1)

LEADERSHIP, ACTIVITIES, & SERVICE

Sub-Team Lead | *Bearcats Electric Vehicle Club, University of Cincinnati*

August 2024 - Present

- Develop a touchscreen interface to display real-time battery status using C and C++
- Optimize battery monitoring solutions to ensure efficient vehicle performance

Mentor | *Bearcat Coders, University of Cincinnati*

January 2025 - Present

- Guide 20+ high school students in web design basics including HTML, CSS, and JavaScript
- Tutor students in Python and helped them develop skills in project design

AVAILABLE FOR CO-OP/INTERNSHIP: SPRING 2027
